## Security Firm Deploys AI as 'Virtual C 1

Allied Universal security employees in a training session. A HOTO: ALLIED UNIVERSAL

Aug. 13, 2019 5,30 am ET

Allied Universal, a provider of facility services and security that was founded in the 1950s, is using artificial intelligence to help its guards better patrol buildings and sites.

## Guards use devices such as smartphones t epp

where security risks merit the most resources, according to Mark Mullison, Allied Universal's chief information of cer: For example, a guard may visit a parking garage once an hour and observe people in the area, noting details such as the route they took, hows

The goal is to do a better job of getting security guards in the right place at the right time, he said Allied Universal has more than 200,000 employees, including about 175,000 security guards.
