> RFID Technology for Mustering

> Mobile & Wi-Fi Signal Detection

Ideal for security programs seeking to cost effectively integrate manpower with the latest in technology to improve risk management and promote a forward thinking brand.
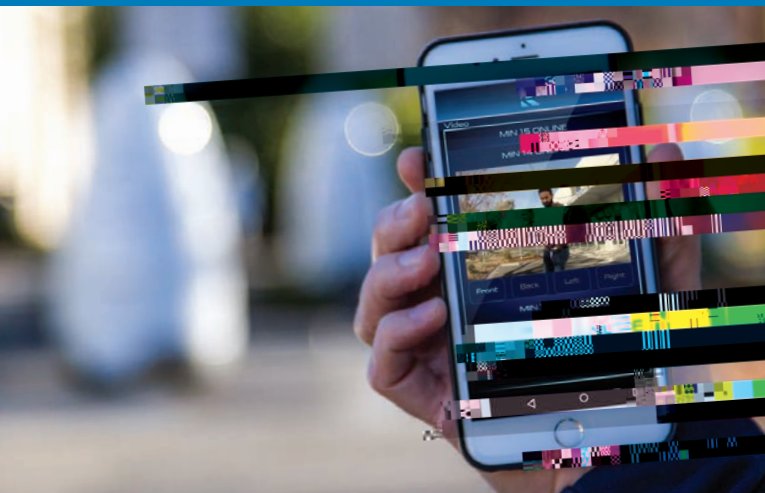

Benefits Include:

> Deter crime, identifying and addressing safety and security issues in real time

> Monitor data and receive alerts 24/7 for quick res onse, visual feedback and data su ort

> Integrate into current security rogram, without interru tion to security o erations

> Ex and security coverage without investing in additional man ower and training

> Im rove em loyee safety after hours and during late shifts

> Reduce coverage of remote areas without sacrificing security

> Detect and analyze unusual, unauthorized access and assist in crowd and traffic control efforts

> Deliver emergency notifications and instructions to ublic or em loyees

> Detect and alert for fires or unusual tem erature fluctuations for critical systems

> Ca ture time-stam ed data for historical analysis or attern recognition

> Identify signal anomalies that could indicate cyber security or intellectual ro erty risks

To learn more about ADMs and how they could add to your security program, call us at 866.825.5433 or visit us at aus.com/adms
