

Vehicle Hazards

Vehicle inspections and safety features help protect drivers and passengers from deadly driving hazards, but may not be enough. Preparing for situations, such as those listed here, in advance can help reduce the risk of a serious accident, injuries and death.

Runaway Engine

While driving, your vehicle suddenly starts to accelerate and you can't stop.

In a vehicle with an automatic transmission, shift the engine into neutral to slow it down.

In a vehicle with a manual transmission, step on the clutch pedal. The engine will still race but the
